

Hi there! 🙋 I'm Ram Pratap Ranjan~

I'm a Software Engineer with over 5 years of experience, presently serving as a Senior Software Engineer at an IT startup in South Korea. My expertise spans Backend development, SQL-based databases, and Machine Learning libraries and models. Additionally, I possess moderate experience in front-end development.

Throughout my tenure in Software Engineering, I've gained experience with a variety of programming languages, libraries, frameworks, and technologies including Java, Python, MySQL, PostgreSQL, Springboot, React, PyTorch, Jenkins, Docker, and AWS.

I completed my master's degree in Computer Science in 2019 and accumulated a decade of experience as a programmer. While in my final year of college, I developed RFID-based software utilizing Java and MySQL. This software is currently deployed in the examination building and reading hall of Pondicherry University.

My interests range from software development, big data, and machine learning to AI. I am continuously driven to explore and expand my knowledge across various technological domains.

On a personal level, I am deeply passionate about self-improvement and continual personal growth. I firmly believe in the endless opportunities for learning and development in my professional and personal life. In my leisure time, I enjoy traveling 🏠🍌 and listening to podcasts 🎧. I'm enthusiastic about connecting with like-minded tech enthusiasts who share my passion. Let's join forces and work together to create a positive impact!

My Github repositories and Stackoverflow profile links are below:

Github: <https://github.com/rpranjan11>
